Frequently Asked Questions

What type of white beans should I use?

Any creamy white beans, such as cannellini, great northern or navy beans, will work well.

How do I keep the sandwich from getting soggy?

Lightly toast the bread and make sure the beans and vegetables are well drained and patted dry before assembling. You can also keep the components separate until you're ready to enjoy the sandwich.

What can I use instead of mayonnaise?

You can swap in plain Greek-style yogurt or sour cream as an alternative. The filling will be slightly tangier but the consistency should be similar.

What are Persian cucumbers, and can I use a different kind of cucumber?

Persian cucumbers are a small, thin-skinned variety of cucumber known for their crisp texture and mild, slightly sweet flavor. They have very few seeds, which means less water and more crunch. You can use a different cucumber, but be sure to pat the slices dry to prevent the bread from becoming soggy. If you use a cucumber with a thicker skin, consider peeling it as well.
