

Homemade Protein Powder

Make this protein powder recipe at home with a mix of chia, hemp and pumpkin seeds. This blend creates a smooth protein powder without the need for store-bought powders, which can be pricey. Add a scoop to your next smoothie or bowl of oatmeal or try it in baked goods for a quick way to boost your plant-based protein intake.

Ingredients

1 cup chia seeds, divided

1 cup hemp seeds, divided

¼ cup raw pepitas

Directions

Step 1

Place ¼ cup chia seeds, ¼ cup hemp seeds and ¼ cup pepitas in a spice grinder. Pulse just until finely ground, about 10 pulses. Transfer to a bowl. Repeat in 3 more batches with the remaining chia seeds and hemp seeds. Stir to combine. *(Alternatively, pulse all ingredients together in a high-speed blender until finely ground, about 15 (1-second) pulses, stopping to scrape the seed mixture from the bottom of the blender occasionally.)*

To make ahead

Store on the counter in an airtight container for up to 2 weeks or refrigerate for up to 2 months.

Equipment

Spice grinder

Frequently Asked Questions

Can I freeze this protein powder?

Yes! You can freeze this protein powder for up to 6 months in a freezer bag or airtight container.

What can I use to flavor this protein powder?

After it's ground, you can stir in cocoa powder or cinnamon to try a different flavor profile. However, we recommend sticking with the plain powder if you're planning to use it in recipes where the taste may be altered.

What can I use this protein powder in?

This protein powder works well in smoothies, oatmeal or baked goods like muffins and pancakes. When added to liquids like smoothies or shakes, this powder may cause them to thicken over time due to the natural gelling properties of the chia seeds.

Can I swap out the hemp seeds for something else?

Yes. Hemp seeds offer healthy fats, protein and a nutty flavor so you'll want something with a similar nutrient profile, flavor and texture. Flaxseeds, sesame seeds or hulled sunflower seeds will work, though each may alter the flavor and nutrients.

How much liquid should I add to a serving?

There's no fixed liquid-to-protein-powder ratio here. Because the blend includes chia seeds that swell as they hydrate, using less liquid will give you a thicker consistency.
